Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: discussed Aharoni reference and how it inherently disclose the prioritization limitation. Examiner indicated that packetization, prioritization for object-based media information is well known in the art, shape, motion, and texture information are integral part of the I-, P-, and B- frames as MPEG standard indicate, and the functions of the VTA is provided by part of Fig. 9 in Aharoni. Examiner indicated that there are plenty of prior art that reads on all the limitations in the claims and that examiner will provide a first office action to show that. .
